

Overview

An introductory short course is being offered for European Railway Engineering students starting a postgraduate degree in a rolling stock related topic and for researchers starting their career in the railway industry. Lectures will be given by experts from Universities and industry across Europe, on topics related to their expertise and experience. The latest theoretical developments will be covered as well as current practice in the areas of design, manufacturing and operation of railway vehicles and also wider issues connected with railway transport.

This is the 5th Rolling Stock Summer School, following the successful events held in Cracow, Poland, in 2010, 2012, 2014 and in Lecco, Italy, in 2016. It aims to provide students with a broad introduction to the field from practicing experts and also to give an insight into the latest research being carried out in several areas. The course also aims to build up links between different institutions across Europe and to provide students with an initial network of contacts that should be useful throughout their career.

To allow a wide participation the summer school has been designed to keep the cost to students as low as possible. All lecturers are donating their time and we do not aim to make a profit

Summary of important dates

Pre registration (suggested): until 5th June 2020

Deadline for registration and payment fee:
3rd July 2020

Summer School:
Aug. 31st - Sept. 4th 2020

The location

The city of Lecco enjoys a unique position on the eastern shores of Lake Como, surrounded by mountains and within a short reach from outstanding cultural and touristic attractions including ancient churches and monasteries, stately mansions and unforgettable landscapes. The city also offers a wide range of sports and activities including sailing and rowing on the lake, mountain hiking and biking, rock climbing. Efficient public transportation connections are available to reach Lecco from Milano (Malpensa and Linate) and Bergamo (Orio al Serio) airports.

Registration fee and how to get involved

The cost of participation is €500. This will include all lectures and seminars, course material and meals. Accommodation is not included in the registration fee and shall be booked directly by the attendees, see below.
